## CREW CARRYING VEHICLE

### USE

The Crew Carrying Vehicle, or CCV as it is commonly called, is designed to transport a 17-person fire crew from a conservation camp or fire center to a community project or an emergency incident. The CCV, like CDF's Code 3 Emergency Crew Transport (ECT), is designed with ample storage space for all the equipment needed by the crews. In addition to fire tools, sleeping bags, and personal protective equipment, the CCV carries rations, water and a firefighter's personal affects. The vehicles carry everything the crew needs to be selfsufficient for at least 48 hours. Wherever a CCV is parked, a crew is nearby either providing emergency activities or participating in conservation related work. CDF will be replacing its entire fleet of CCVs with ECTs over the years as CCVs are retired through the natural attrition process.

### CREW

Seating for 17 personnel

### MANUFACTURERS

Chassis: Navistar 4900

### SPECIFICATIONS

Gross Vehicle Weight: 33,000

Engine: Navistar 230 H.P. Diesel Motor

Front Axle: 12,000 lbs.

Rear Axle: 21,000 lbs.

Transmission: Allison World 3560 6-Speed Automatic

Wheel Base: 188"
